Transform your Thunderbolt 5 or USB4 laptop into a high-resolution, multi-monitor workstation

Simplify your workspace with a high-performance dock that supports Thunderbolt 5, Thunderbolt 4, and USB4 laptops. Supports multiple displays up to triple 4K displays, 140W laptop charging, and 2.5G Ethernet, all through a single connection.

Advanced Display and Charging Capabilities

Connect up to four extended 4K 60Hz displays on Windows using HDMI and DisplayPort outputs. On Mac, support dual 6K on MacBook Air and entry MacBook Pro, up to Triple 4K 120Hz on MacBook Pro with M5 Pro, or Quad 4K displays when daisy chaining 2 Thunderbolt monitors with M5 Max. The docking station includes an 180W power adapter that can supply up to 140W to charge high-performance laptops such as the MacBook Pro. A dedicated 45W Thunderbolt 5 port provides data connectivity and charging for phones or tablets without drawing power from the host computer.

Networking and Compatibility

Enjoy faster cloud access, file transfers, and virtual collaboration with the wired 2.5G Ethernet RJ45 port. Driverless dock is compatible out of the box with Windows 11 and macOS 15 / 26 systems that feature Thunderbolt 5, 4, or USB4 connectivity, helping ensure IT-managed deployments stay efficient and consistent.

Secure and High-Functioning Workspace

Dual security slots (K-Slot and Nano) let you physically secure the dock, helping prevent theft in shared environments or high-traffic workspaces. Connect high-performance peripherals through the downstream Thunderbolt port with up to 80Gbps/120Gbps bandwidth, while delivering up to 45W Power Delivery for fast device charging. Use the 3.5mm audio jack to connect headsets or speakers for seamless conferencing or media playback.

Enterprise Management Tools
