Multifunctional module for the DJI Osmo Mobile

Model: CP.OS.00000565.01

Manufacturer: DJI

EAN: 6937224142831

Product Code: 1557571

R1,897

DJI OM 2 Multi-Function Module

The DJI OM 2 Multi-Function Module expands the capabilities of the Osmo Mobile 8P gimbal, offering intelligent subject tracking, gesture control, and built-in lighting with 8-level brightness and color temperature adjustment, making it easier to shoot in a variety of conditions. This practical solution will be particularly appreciated by solo vloggers who need greater control over the frame without additional support. The module operates in plug-and-play mode and connects directly to the USB-C port on the roll axis, allowing for quick and convenient setup at any time. The built-in artificial intelligence enables smooth tracking of people, animals, vehicles, and other objects without overloading the smartphone. An additional advantage is its broad compatibility with DJI OM magnetic mounts and the Quick-Release system, which translates to greater freedom of use and ease of accessory attachment.
