InLine 26902P power cable Black 2 m DC 3.5 x 1.35 mm

Model: 26902P

Manufacturer: INLINE

EAN: 4043718349562

Product Code: 1558081

R848

Greater reach and space-saving connection with DC angled plug

Flexible positioning: Extend an existing DC power connection and position compatible devices more independently of the power supply unit’s location.

Space-saving cable routing: The angled DC plug takes up less space at the device connection. The straight DC socket accommodates the existing plug.

Precision-fit connection: The 3.5 x 1.35 mm plug and socket connect compatible DC components without changing the connection type.

Robust cable design: The 2-core cable with AWG 18 and PVC sheath is suitable for extending existing DC connections.

Check compatibility before purchasing: Compare the connection dimensions, operating voltage,

current rating and polarity with the specifications of the power supply unit and the connected device.

With the DC extension cable, you can adapt the position of a compatible device to the spatial constraints of the installation. The cable bridges the gap between the power supply and the device. This allows you to continue using existing components and to route the cable flexibly.
The angled plug facilitates space-saving cable routing at the device connection. This is helpful if there is limited space behind the device or if the cable needs to be routed away from the connection to the side. The straight socket accommodates the existing DC plug.
The combination of an angled plug and a straight socket allows the connection to be adapted to different installation scenarios. The connection dimensions of 3.5 x 1.35 mm must match the existing connection on both sides.

Connection A: DC plug, angled
Connection B: DC socket, straight
Connection dimensions: 3.5 x 1.35 mm
Conductor cross-section: AWG 18
Cable construction: 2-core
Cable sheath: PVC
Outer cable diameter: 5.0 ± 0.2 mm
Contact housing: Nickel-plated
Operating voltage: 12–24 V
