solution for connecting smartphones, tablets, power banks, and other mobile devices. Thanks to the USB 2.0 standard, the cable enables fast data transfers at up to 480 Mb/s and efficient charging of your devices.
There are two different designs. The rectangular Micro-A connector (for the host side) is less common. In addition to the uniform USB-C charging standard, the Micro-B connector with its trapezoidal design (device side) is still widely used and installed in many older devices.
The robust construction with overall braiding and foil shielding as well as gold-plated contact pins ensures long-lasting performance—even with frequent use. Different cable lengths allow for flexible use, adapted to various areas of application such as the workplace, household, or mobile applications.

Standard: USB 2.0
Connectors: USB-A plug to Micro-B plug
Construction: 2x AWG24 + 2x AWG26 wires
Shielding: Overall braid and foil shielding
Contact material: Gold-plated contact pins, nickel-plated clamp
Maximum data transfer rate: Up to 480 Mb/s
Packaging: In PE bag with EAN code
