R1,684

Lockable tablet counter mount for permanent installation, swivelling and tilting for secure presentation solutions

Theft protection thanks to lockable mount: The integrated lock reliably protects the tablet from unauthorised access. Ideal for permanently installed applications.
Space-saving solution for permanent installation: The compact counter mount is fitted directly onto surfaces. Ideal for stable, permanently installed presentation points.
Flexible positioning for optimal visibility: The tablet can be rotated 360° and tilted from -65° to +80°. Content can be displayed optimally at all times.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

High compatibility thanks to precise dimensions: Suitable for tablets with a width of 134–197 mm, a height of 196–270 mm and a thickness of up to 14 mm. Also supports many current devices up to approx. 11".
Neat installation thanks to integrated cable management: Cables are routed inside the mount. This ensures a tidy and professional appearance.

The InLine® tablet counter mount offers a compact and stable solution for the permanent integration of tablets on work surfaces and presentation areas. Mounting to a surface ensures a permanently secure position.
The lockable mount reliably protects the tablet from unauthorised access. This makes the solution particularly suitable for public environments with permanently installed devices.
Thanks to the flexible adjustment options, the tablet can be optimally aligned. The mount can be rotated 360° and tilted from -65° to +80°. This ensures that content is clearly visible at all times.
The integrated cable management ensures a clean installation with no visible cables. This enhances a professional appearance and facilitates integration into existing environments.
The tablet mount is precisely designed for devices with a width of 134–197 mm, a height of 196–270 mm and a thickness of up to 14 mm. This means that many current tablets up to approx. 11" can also be securely mounted.

Supported tablet width: 134–197 mm
Supported tablet height: 196–270 mm
Maximum tablet thickness: 14 mm
Height: 330 mm
Tilt: -65° to +80°
Rotation: 360°
Base plate dimensions: 31.5 x 22 cm
Material: aluminium, plastic, steel
Internal cable management
Lockable mount
Mounting type: fixed table/counter mounting
