InLine Table clamp for socket strip, white

Model: 23191W

Manufacturer: INLINE

EAN: 4043718294039

Product Code: 1558824

R897

Flexible attachment of socket strips: Ideal for desks with a top thickness of 10-50 mm - also height-adjustable.
Gentle mounting with silicone pads: Prevents scratches on furniture and protects connected devices.
Compatible with many devices: Holder suitable for power adapters, USB hubs or other accessories.
Robust material combination: Made of steel, ABS plastic and silicone gel - powder-coated for long-lasting use.
Tool-free mounting: Quick and stable fixation - ideal for flexible workstations or temporary installations.

The InLine® desk clamp for multiple socket outlets enables secure and flexible mounting of multiple sockets directly at the workstation. The robust screw clamp is compatible with table tops from 10 to 50 mm thick and is also suitable for use on height-adjustable tables.
The integrated silicone pads protect both the table surface and connected devices from damage.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The recommended width for power strips is 50 to 70 mm - so many common models can be easily integrated.
In addition to attaching power strips, the powder-coated holder is also suitable for fixing small devices such as USB hubs, power supply units or compact adapter solutions. Installation is quick and tool-free - perfect for modern offices, technology rooms, training centers or event spaces.
With its combination of functionality, stability and protection, the desk clamp is a practical addition to professional workplace concepts.

Suitable for socket strips with a width of 50-70 mm
