InLine 33051E audio converter Grey

Model: 33051E

Manufacturer: INLINE

EAN: 4043718340804

Product Code: 1558832

R868

Immediate solution for defective audio sockets- ideal for quick repairs without replacing hardware
Wide system compatibility- usable with Windows XP to Windows 11, Mac OS and Android
No driver required- Plug & Play for easy integration into working environments
Rugged construction- aluminum housing for long-lasting use in professional environments
Compact format- ideal as part of a mobile IT toolkit

The InLine® USB Audio Sound Adapter with USB-A connection offers a reliable and ready-to-use solution for audio expansion or for quickly restoring the sound function on PCs, notebooks or tablets. Thanks to the plug & play principle, no driver installation is required, meaning the adapter is ready for immediate use - even in extensive rollouts or support deployments.
With its broad compatibility - from Windows XP to Windows 11 as well as Mac OS and Android - the adapter is particularly versatile. The integrated SSS1700 chip ensures stable audio transmission. A stereo output socket and a microphone input enable both audio output and recording via headsets or microphones.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The robust aluminum housing protects the adapter in daily use, while its compact format makes it easy to carry in the IT toolkit. Whether as a supplement in the warehouse or as a repair solution in the field - this adapter is standard equipment in any professional IT environment.
