Model: 18.7238.6030

Manufacturer: WMF

EAN: 4000530630964

Product Code: 1561811

R1,404

Features: The digital thermometer can be used in many ways in the kitchen. For example, they can be used for hot and cold drinks and foods. The extremely quick reaction and measurement time of 4-10 seconds is a characteristic of the thermometer. You can measure the temperature of your food and drink in either Celsius or Fahrenheit. The measurement range is between -40 and +200°C or -40 and +392°F and the deviation from the actual temperature is a maximum of $\pm 1^{\circ}\text{C}$. The numerical LCD display has background lighting and is thus extremely bright. Function: the thermometer must not be used in a closed oven. Just hold for a few seconds in the food - and it's done! The thermometer must be cleaned by hand with a cloth- NOT dishwasher safe.
