The transparent fin on its back blazes like hot flames, and the scales on its back makes it look as if the Magma Lizard has just climbed out of a volcano. You better not mess with this giant lizard from the Lava World! Every time the Magma Lizard opens and closes its massive jaws, you can see its tongue. Creepy!

Its yellow eyes look mean and know no mercy. Although the Magma Lizard looks like a fiery creature, it actually has a heart of ice. Anyone who dares to disturbs it is greeted with a sinister snort from its powerful snout. If that's not enough, it opens and closes his jaws in warning. You can even see its thick, yellow tongue. No one wants to get too close to the Magma Lizard. That would be much too dangerous. You might burn your fingers on the transparent fin of flames on its back!
