

GBC WireBind Binding Wires 3:1 No3 5mm Silver (100)

Model: 2101007E

Manufacturer: GBC

EAN: 5028252218108

Product Code: 1566805

R1,034

Binding doesn't get any simpler! Suitable for use on all WireBind machines, WireBind Binding Wires add a quality, contemporary finish to documents requiring permanent binding. Packed in 100's, these 5mm, 34-loop silver A4 wires bind up to 35 sheets. Once bound, pages can be rotated by 360 degrees and lie flat for easy photocopying.

- Professional: WireBind is the premium choice for a truly professional document finish.
- Durable: the tough metal WireBind construction binds documents firmly, ensuring page security and a lasting finish.
- Precision spacing: to guard against paper movement when bound.
- Double-loop wire construction: minimises flexing for greater binding stability.
- Flexible: ideal for both square or round 3:1 pitch hole options.
- Secure: ideal for confidential documents as pages can only be removed by destruction of the wire itself.

- Full range of sizes and colours available.

- For wire binding larger documents, please refer to 2:1 Pitch Wires which can bind up to 250 sheets.
- Professional WireBind system for a truly published finish; Tough metal construction for durability; Precision spacing to guard against paper movement; For binding larger documents, 2:1 pitch wire documents; Bind up to 250 pages with ease.

Binding doesn't get any simpler! If you need professionally bound documents with a top quality, contemporary finish, the high-tech GBC WireBind spine is the ideal binding solution. From prestigious client proposals to annual reports, GBC WireBind will take your presentations to the next level. Wire binding provides a secure, long-lasting and stylish bind, combining the strength of double-loop wire with the convenience of flat page opening. Pages are bound so securely that they remain intact and tamper-proof whilst ensuring that documents maintain their professional appearance for the lifetime of the information. Once bound, pages can only be replaced or amended by removal of the wire itself - ideal when page security or confidentiality is an integral requirement of the document. Whether you are a novice or expert binder, wire binding is a relatively easy 4-step process that everyone can master. Simply: 1. Collate the pages you wish to bind. 2. Punch the pages in batches according to the punch capacity of your machine. 3. Insert the punched pages onto the open fingers of the wire to prepare for wire closing. 4. Complete the binding process: with all pages and your chosen covers placed securely, the wire is neatly compressed to form an O-shaped spine and your document is complete. All wires are pre-cut to standard A5 or A4 paper sizes and come with turned ends to ensure there is no sheet loss through continuous rotation and use. The 3:1 pitch (34-hole) wire is suitable for all Standard Wire Machines. GBC 3:1 Pitch Wires are available in 7 different sizes, in both A4 and A5. Choose from 5mm up to 14 mm wires, enabling you to bind documents from 2 to 125 pages. The 3:1 wires come in a wide range of colours so you can customise your document finish for optimum stand-out and for shelf recognition purposes.
