R5,011

Racing-Inspired Design

Drawing inspiration from vintage racing heritage, the dial integrates elements of classic dashboards—a tribute to mechanical precision and the pursuit of speed. Iconic racing stripes extend from the bezel to the strap, creating a seamless, high-velocity aesthetic. Complemented by sculpted beveled edges, the multi-layered architecture embodies a bold, competitive spirit that comes alive with every movement. A highly recognizable graduated inner bezel, segmented with a 1/3 blue-white

3D Distance Measurement

It supports 3D distance measurement, providing more accurate calculations in complex scenarios like trail running, mountaineering, and cycling. Stay informed with severe weather alerts, helping you precisely master every workout.

Professional Running Coach

This mode helps you advance your running journey.

Lactate Threshold Heart Rate Monitoring

It offers lactate threshold heart rate monitoring to precisely control your training intensity.

AI Running Coach

The AI Running Coach provides real-time voice guidance, acting as your personal trainer throughout your run.

Lock in Heart Rate or PaceTargets

You can lock in heart rate or pace targets, with dynamic adjustments to help you train efficiently and progress steadily.

New Posture Analysis

New posture analysis helps optimize your running form and improve efficiency.

HONOR AccuTrack System

Equipped with a new GNSS chip and dual-band GPS technology, it achieves faster satellite acquisition and more precise positioning, accurately recording your every movement.

120+ Sports Modes

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

Covering 120+ sports modes such as running, cycling, strength training, dancing, MMA, skiing, and stair climbing, meeting the needs for both professional and daily sports across all scenarios.

Body Energy Assessment

Integrate multi-dimensional health data such as heart rate, HRV (heart rate variability), sleep, and stress to accurately detect the body's energy status and dynamically evaluate the energy consumption level.9

Combine personalized factors such as body energy value, weather, and menstrual period to intelligently push customized suggestions such as exercise and rest.

At the same time, help improve the body's energy reserve capacity by guiding regular work and rest, scientific exercise, breathing training, etc.

Blood Pressure Trend Monitoring

Experience seamless dynamic blood pressure monitoring. It generates risk assessment results within 3 days and provides scientific health management advice.

Quick Health Scan

With a single tap, effortlessly access your health data and stay informed about your physical well-being anytime, anywhere.

Healthy Morning Report

Kickstart your day with a comprehensive overview of your previous day's health, empowering you to manage your wellness effectively

Intelligent Sense System

Utilizing a distributed optical design, the Intelligent Sense System enhances signal acquisition precision, providing a robust technological foundation for seamless, comfortable health monitoring.
