

InLine 94104 solar panel accessory Mounting tool

Model: 94104

Manufacturer: INLINE

EAN: 4043718334858

Product Code: 1567678

R1,692

Efficient work on the construction site:The complete set offers all the tools required for professional processing of PV connectors in a robust, portable system.

Standard-compliant connection technology:The MC4 crimping pliers with ratchet mechanism ensure reproducible, standard-compliant crimping in professional use.

Safe stripping without damaging the cable:The automatic stripping pliers adapt automatically to different cable diameters, thus protecting the inner conductor.

High cutting precision:The integrated cable cutter enables clean, smooth cuts on PV cables up to 6 mm² – for reliable contact quality.

Fast handling of MC4 connections:Two release tools allow existing plug connections to be disconnected effortlessly – ideal for service work.

The InLine® Solar Photovoltaic Tool Set is the well-designed solution for professional users in the renewable energy sector. It combines all the essential tools for installing, maintaining and repairing photovoltaic systems in a mobile, professional set. Developed for solar installers, system integrators

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

and electricians, it provides a reliable basis for efficient work directly on the construction site or at the customer's premises.

Thanks to the automatic wire stripper, different cable cross-sections can be stripped quickly and without damage. The robust solar cable cutter ensures precise cuts – a must for secure connections. The MC4 crimping pliers with ratchet function deliver consistent crimping in accordance with industry standards and increase the reliability of the systems. Two release tools ensure that existing connectors can be quickly disconnected without risk of mechanical damage.

The practical bag with hanging loop offers structured storage space and easy transport – a valuable advantage for mobile use. Whether for new construction, expansion or maintenance: with the InLine® tool set, you are well prepared for all tasks in the photovoltaic sector.

Contents: Solar cable cutter, automatic wire stripper, MC4 crimping pliers with ratchet, 2x release tools, 1 pair of MC4 connectors (plug & socket)

For cable cross-sections: up to 6 mm²

Packaging: robust tool bag with hanging loop

Compatibility: standard PV cables (e.g. 4 mm², 6 mm²)
