Euhomy BR001-110 91L Beverage Cooler (Silver)

The Euhomy BR001-110 is a beverage cooler that's perfect for the living room, kitchen, office, or home bar. Compact yet spacious (91 L)—it holds plenty of beverage cans. It features intelligent temperature control, 360° air circulation, and multi-layer thermal insulation, ensuring a consistent cooling level without frost buildup. Plus, its modern design with tinted, tempered glass and blue LED lighting gives the refrigerator a sleek and stylish look. It's quiet, energy-efficient, and convenient to use—designed to keep your favorite drinks perfectly chilled at all times.

Cooling from Every Angle

Thanks to 360° Full-Angle Cooling technology, the refrigerator evenly distributes cool air throughout the interior. This means that every can, regardless of its position, is properly chilled. The cooling system is based on a circulation fan that works in conjunction with an electronic thermostat. The temperature range from 3°C to 16°C allows you to adjust the cooling to suit different types of—

beverages—from milk, to cola and beer, to sparkling wine.

A Design That Stands Out

The front of the refrigerator is made of tempered glass with a Low-E coating, which reflects heat radiation and prevents the interior from heating up. As a result, the refrigerator consumes less energy and reaches the set temperature faster. The interior is illuminated by cool-blue ambient LED lighting, which not only looks impressive but also makes it easy to quickly find your favorite drink in the evening or during a party.

Pleasantly Quiet Operation

With a noise level of just 36 dB, the Euhomy BR001-110 won't disturb your sleep, conversations, or remote work. This makes it perfect for a home office, where peace and quiet are essential. You can also place it in your bedroom or near your relaxation area—you won't even notice it's running.

Well-designed interior

Four removable shelves and eight mounting positions let you customize the interior to suit your needs. You'll have no trouble fitting cans of various sizes or bottles inside. It's the perfect balance between the refrigerator's size and its capabilities.

Top-Notch Insulation

The exterior is constructed from several layers of thermal insulation: stainless steel, high-density foam, and a Low-E coating on the glass. This prevents outside heat from entering, which increases cooling efficiency and reduces energy consumption. The refrigerator doesn't waste electricity, and the temperature inside remains stable for a long time—even with frequent door openings.

Functionality in Every Detail

The refrigerator features a built-in handle that makes it easy to open. Adjustable feet allow you to position it stably even on uneven surfaces, and the door can be installed on the left or right side—you decide how best to fit it into your interior.
