

Epson EB-770F 4100 ANSI lumens 1080p (1920x1080) White

Model: V11HA79080

Manufacturer: EPSON

EAN: 8715946715841

Product Code: 1572806

R48,425

Agile UST laser display

Drive engagement and communication with an affordable display, up to 150", that will improve productivity in any environment.

Whatever the size of class or meeting room, unrestricted and immersive presentations are possible with this bright, clear, compact and affordable display solution.

The EB-770F's bright, 1080p image, scalable up to 150", is clearly visible from every angle and at a distance, and content can easily be shared or streamed directly from multiple devices for the ultimate collaborative experience.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The EB-770F's ultra short throw lens allows safe, discreet positioning close to the display, enabling presenters free access to perform without casting shadows.

With 4,100 lumens CLO and 3LCD technology, the display is bright and vibrant up to 150", clearly visible from all angles and at a distance. The experience is immersive and user-friendly.

Scalable from 49-150", display sizes can be optimised for each room with one product and a fixed cost, and the EB-770F supports multi-projection edge-blending for a low cost, large, seamless, energy efficient 3780x1080p image.

Versatile wired and wireless connectivity options, including Miracast™ screen mirroring, ensures effortless, multi-device content sharing, and with a connected optional Epson visualiser, documents, presentations or 3D objects can be projected in incredible detail to the whole room.

Unlike a flat-panel display, there is no heavy, breakable, glass panel to create disruptive, reflected blind spots at certain angles, and teachers are not subjected to LCD panel direct blue light radiation, believed to damage eyes. Paired with a hygienic, antibacterial whiteboard, teachers can annotate presentations with dry-wipe pens, or to save energy, simply use the whiteboard with the display turned off.
