

EcoFlow DELTA 3 Plus Portable Power Station

Model: EFDELTA3P-EU

Manufacturer: ECOFLOW

EAN: 4895251626354

Product Code: 1573073

R20,926

EcoFlow DELTA 3 Plus Portable Power Station

Enjoy reliable access to power no matter the circumstances! The EcoFlow DELTA 3 Plus portable power station offers a capacity of up to 1 kWh (with the option to expand to 5 kWh) and power up to 1800 W (or up to 2400 W in X-Boost mode), allowing it to power most commonly used devices for a long time. It is also distinguished by its quiet operation and long battery life – up to 4000 charging cycles. You can also charge it in several ways, which means that in almost any situation you can easily prepare it for further use. DELTA 3 Plus also works well as a UPS (with support for HID functions), and its convenient operation is enabled by a dedicated app.

Multiple charging options

The station supports several charging methods, so you can easily prepare it for operation in almost any situation. Using the AC socket, you can charge it in about 56 minutes. In sunny weather, it is worth using photovoltaic panels up to 1000 W – this way, you can restore its full power in about 70

minutes. You can also charge it with a power generator. Another option is a car alternator – this method will charge the station in about 1.3 hours. It is also possible to combine charging using an AC outlet and photovoltaic panels – charging this way will take about 56 minutes.

It will power most of your devices

A sudden power outage, a camping trip, or a trip to places cut off from the power grid – the EcoFlow DELTA 3 Plus station will come to your aid in these and many other situations! Its output power reaches 1800 W, and thanks to the X-Boost mode, it can easily handle devices up to 2400 W. So you can connect most commonly used appliances, such as a refrigerator, smartphone, computer, router, and even a hair dryer, kettle, or microwave.

As many as 11 available ports

With the EcoFlow DELTA 3 Plus, you can power up to 11 devices at the same time! The station is equipped with a variety of ports – it offers four AC outlets (1800 W), two USB-A ports for fast charging (up to 36 W each), two USB-C ports (up to 140 W each), one car outlet (12.6 V, 126 W), and two DC5521 ports (12.6 V, up to 3 A). This means you don't have to limit yourself!

Surprisingly quiet operation

The DELTA 3 Plus proves that powerful capabilities can go hand in hand with quiet operation. At a load of 600 W, the station's noise level is only about 30 dB, which is the same as a ticking clock or a whisper. This makes it ideal for situations where silence is required, such as at night. Don't worry, it won't disturb your peace and quiet!

UPS function – be prepared for power outages

Unexpected power failure? With the EcoFlow DELTA 3 Plus, you have nothing to fear! The station will switch to emergency power in just about 10 ms, ensuring uninterrupted operation of essential devices. It is perfect for computers or 3D printers, for example. What's more, DELTA 3 Plus supports NAS systems and HID functionality – when its battery is about to run out, it will send a signal to the server to save data and shut down safely.

You can do more with the app

The DELTA 3 Plus station works with the EcoFlow app, which allows you to remotely manage its operation and monitor key parameters, among other things. You also have access to a storm warning feature and TOU (Time of USE) modes, which allow you to optimize energy consumption and save on bills. You will also receive notifications about possible power outages and UPS operation.

Efficient and durable

The station uses a durable LiFePO4 (40135) battery with a lifespan of up to 4,000 charging cycles (up to 80% capacity). As a result, you get about 10 years of use! But that's not all – a special BMS system intelligently manages its operation, ensuring reliable performance. DELTA 3 Plus also stands out with its IP65 rating, making it resistant to water and dust. It is also protected against thermal propagation, which prevents hazards such as fire.

1 kWh capacity with expansion option

Power your selected devices for hours on end. The station has a capacity of 1 kWh, which you can expand to up to 5 kWh – DELTA 3 Plus is compatible not only with its own battery, but also with batteries for DELTA 2 Max and DELTA Pro 3. Ensure you have enough power to enjoy uninterrupted operation of essential equipment for as long as you need!

Easy to transport

Moving the station from place to place will not be a problem. It weighs approximately 12.5 kg and measures 398 x 200 x 284 mm, so you can easily take it with you on a trip or carry it to your garden, for example. In addition, the compact design means that the DELTA 3 Plus fits perfectly even in tight, confined spaces, such as in a car or between furniture.

Included:

- Portable power station
- AC cable
- User manual

General

Manufacturer	EcoFlow
Model	DELTA 3 Plus
Color	Silver
Capacity	1024 Wh
Weight	≤ 12.5 kg
Dimensions	398 x 200 x 284 mm
App	Yes (TOU, storm warning)
Capacity expansion	Yes, up to 5 kWh (compatible with additional batteries for EcoFlow DELTA 3, DELTA 2 Max, DELTA Pro 3)

Outputs

Total number of output ports 11

AC	4x 1800 W (max. instantaneous power 3600 W)
Max. power with X-Boost	2400 W
USB-A (for fast charging)	2x 36 W max.
USB-C	2x 140 W max.
Car output	12.6 V 10 A, 126 W max.
DC output 5521	2x 12.6 V, 3 A max.

Inputs

AC charging	1500 W (approx. 56 min)
Charging via solar panels	DC input 11-60 V, 2x 500 W max. (approx. 70 min)
Charging with Smart Generator	1500 W (approx. 56 min)

Charging in a car

800 W (approx. 1.3 h)
