

EcoFlow DELTA 3 Portable Power Station

Model: EFDELTA3-EU

Manufacturer: ECOFLOW

EAN: 4895251626422

Product Code: 1573290

R18,582

EcoFlow DELTA 3 Portable Power Station

Ensure reliable access to power in almost any situation! The EcoFlow DELTA 3 Portable Power Station stands out with a capacity of up to 1 kWh (expandable to 5 kWh) and offers up to 1800 W of power (up to 2400 W in X-Boost mode). It can be charged in several ways and is highly durable, as well as exceptionally quiet, with a noise level of less than 30 dB (at 600 W). It also works well as a UPS (Uninterruptible Power Supply, providing temporary power in the event of a power outage) – it switches to emergency power in just 10 ms. What's more, the dedicated EcoFlow app allows for convenient management of the station.

You can charge it in several ways

With a variety of charging options, you can easily get the station ready for use regardless of the circumstances. For example, you can charge it using an AC (Alternating Current) socket – X-Stream technology means it only takes about 56 minutes! Want to recharge DELTA 3 while camping or in the

garden? Use photovoltaic panels with a power of up to 500 W! It is also possible to charge the station using a car alternator (in about 1.3 hours) or a power generator. You can also combine charging using a socket and solar energy to get the DELTA 3 ready for use in about 56 minutes.

It will power up to 99% of commonly used devices

Going camping, traveling in a motorhome, or maybe an unexpected power outage? The DELTA 3 will work in these and many other situations! The station offers an output power of up to 1800 W, and in X-Boost mode it can handle loads of up to 2400 W. This allows it to easily power most popular devices such as smartphones, computers, routers, refrigerators, and even microwaves and kettles.

Connect up to 11 devices at once

The station is equipped with a variety of ports – you have four AC sockets, two USB-A ports (Universal Serial Bus, a standard interface for data transfer and power supply to electronic devices) up to 18 W each, two USB-C ports (up to 100 W each), one car output (12.6 V, 126 W), and two DC5521 ports (12.6 V, up to 3 A). So you can connect up to 11 devices at once! Say goodbye to limitations and enjoy the reliable operation of the equipment you need.

It won't disturb your peace

Despite its powerful capabilities, the station is surprisingly quiet. At a load of 600 W, its noise level does not exceed 30 dB – the same as a whisper or a ticking clock! This means you can use it even at night without any problems – it won't disturb your peace.

Be prepared for power outages with the UPS function

With EcoFlow DELTA 3, you won't have to worry about unexpected power outages. The station offers a UPS function and can switch to emergency power in just 10 ms! This allows it to ensure uninterrupted operation of devices such as computers, NAS servers, and 3D printers. You no longer have to worry about data loss or damage to your equipment!

Additional features with the app

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. itworkup.co.za | sales@itworkup.co.za | +27 (11)541-9950

Connect the station to the EcoFlow app and get even more features. For example, you can conveniently monitor the most important parameters of the device. There is also a storm warning feature and special TOU (Time of Use, an electricity billing system in which the price per kWh varies depending on the time of day and network load) modes that optimize energy consumption – saving you money on your bills! In addition, the app will send you notifications about any power outages and UPS operation.

An investment for many years

DELTA 3 is equipped with an efficient and durable LiFePO4 battery (40135), which has a service life of up to 4,000 cycles (up to 80% capacity). This translates into approximately 10 years of use! You also don't have to worry about the station breaking down quickly. The IP65 rating guarantees its resistance to water and dust, and thermal runaway protection prevents hazards such as fire. DELTA 3 also uses an intelligent BMS (Battery Management System, which manages the battery and ensures its reliable operation).

Large capacity with the possibility of expansion

The capacity of the DELTA 3 station is as much as 1 kWh – enough to power selected devices for a very long time! You can also expand it to 5 kWh – just use an additional battery for DELTA 3 (1 kW), DELTA 2 Max (2 kW), or DELTA Pro 3 (4 kW). You no longer have to worry about your equipment running out of power!

Easy transport

The station weighs about 12.5 kg and measures 398 x 200 x 284 mm. Transporting it is no problem – you can easily move it from place to place or take it with you on a trip! Thanks to its compact design, the DELTA 3 fits easily even in narrow, confined spaces, such as a car.

Included:

- EcoFlow DELTA 3 portable power station
- AC charging cable
- User manual and warranty card

General

Manufacturer	EcoFlow
Model	DELTA 3
Color	Silver and gray
Capacity	1024 Wh
Weight	≤ 12.5 kg
Dimensions	398 x 200 x 284 mm
App	Yes (TOU, storm warning)
Expandable capacity	Yes, up to 5 kWh (compatible with additional batteries for EcoFlow DELTA 3, DELTA 2 Max, DELTA Pro 3)

Outputs

Total number of output ports 11

AC	4x 1800 W (max. instantaneous power 3600 W)
Max. power with X-Boost	2400 W
USB-A (for fast charging)	2x 18 W max.
USB-C	2x 100 W max.
Car output	12.6 V 10 A, 126 W max.
DC 5521 output	2x 12.6 V, 3 A max.

Inputs

AC charging 1500 W (approx. 56 min)

Charging with photovoltaic panels DC input 11-60 V, 1x 500 W max. (approx. 130 min)

Charging with Smart Generator 1500 W (approx. 56 min)

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
