

Moza Racing R3 Bundle For XBOX & PC

Model: RS053

Manufacturer: MOZA RACING

EAN: 6973137270377

Product Code: 1575404

R7,892

Experience racing like never before with MOZA's Xbox Licensed R3 Racing Bundle. Featuring a powerful 3.9Nm DD Servo Motor, aviation-grade aluminum construction, and durable ISF PU grips, this bundle sets the benchmark for entry-level racing. Enjoy ultra-low torque ripple, mobile app control, and compatibility with top racing games like Forza Horizon and F1. With an innovative X-shaped design, intelligent temperature control, and customizable features, the R3 delivers immersive feedback and precision. Officially licensed for Xbox, this bundle merges console performance with MOZA's Direct Drive technology. Elevate your racing setup with the MOZA R3 Racing Bundle.

MOZA's First XBOX Licensed Racing Bundle

MOZA Racing have collaborated with Microsoft to create our first officially licensed, fully plug and play bundle for Xbox Series X|S and Xbox One.

Precise 3.9 Nm Direct-Drive Powerhouse

The MOZA R3's 3.9Nm motor consistently delivers class leading direct drive power and precisely detailed force feedback easily outperforming traditional 3Nm bases.

Compact Adaptable Design

From desktop to fully dedicated rigs the R3's compact design can be easily adapted to fit any scenario regardless of available space.

High-precision Craftsmanship

With a base crafted from aviation-grade aluminum alloy an ISF PU grips steering wheel and high-strength steel pedals. The R3 sets the benchmark for entry-level racing.

Full Compatibility with Mainstream Games

Compatible with dozens of mainstream simulation racing games, including Forza Horizon, Project CARS, F1, DiRT Rally, and Assetto Corsa series.

3.9 Nm DD Servo Motor

The direct drive servo motor delivers a stable and realistic torque output of 3.9 Nm. It flawlessly replicates the steering force found in road and race cars, providing detailed and immersive feedback direct to your hands.

Innovative X Shape Design

The MOZA R3 features an innovative X shape design, combining striking aesthetics with a unified motor housing for improved cooling efficiency and lasting performance.

Aviation-grade Aluminum

Crafted entirely from aviation-grade aluminum alloy, the R3 base boasts a new sleek appearance while ensuring superb durability and endurance.

The Maximum & Minimum Philosophy

The MOZA R3's compact body and ultra low power consumption delivers maximum torque and excellent temperature control performance.

Ultra-low Torque Ripple & Groove Torque

Our engineers have achieved the ultimate steering force feedback thanks to the R3's ultra low torque ripple and groove characteristics.

Intelligent Temperature Control System

Our advanced intelligent temperature control system delivers a constant and reliable performance under all conditions.

15-bit Encoder

The ultra high 15 bit encoder ensures a highly accurate and realistic steering feel.
