

Teltonika RUTX08 Industrial Ethernet Router

Model: RUTX08000000

Manufacturer: TELTONIKA

EAN: 4779027312477

Product Code: 1576753

R4,420

The Teltonika RUTX08 is a robust industrial router designed to deliver high-speed connectivity and advanced networking capabilities. Equipped with four Gigabit Ethernet ports, this device facilitates efficient data transmission and connectivity for various applications. It operates on a quad-core CPU and includes 256 MB of RAM, ensuring smooth performance under demanding conditions. This router supports a wide range of networking standards, including IEEE 802.3, IEEE 802.3az, and IEEE 802.3u, with a cabling technology of 10/100/1000Base-T(X). It is compatible with multiple network protocols such as TCP, UDP, IPv4, IPv6, and more, enhancing its versatility in different networking environments. Security is a priority with the Teltonika RUTX08, which incorporates advanced security algorithms like SSH and SSH-2 to protect data integrity and privacy. The device's housing is made of durable aluminum, and it features LED indicators for power and status, providing clear, at-a-glance operational insights. Colored in a professional grey and powered by DC, the Teltonika RUTX08 excels in environments where reliable wired connections are paramount, without the need for cellular or WiFi connectivity.
