Ubiquiti RD-5G30-LW efficient solution with a perfected design

The Ubiquiti RD-5G30-LW is a directional antenna with a light design. It works in the 5 GHz band which allows for the creation of efficient

connections.

The Ubiquiti RD-5G30-LW creates efficient and long distance radio links which use the MIMO 2x2 technology and work in the 5 GHz band.

Construction

The RocketDish 5G30-LW is a lighter version of the popular RD-5G30 solution. It weighs only 7.4 kg. Its innovative case is built from an alloy resistant to corrosion and other unwanted processes.

Build

High resistance to unfavourable weather conditions leads to a long, problem-free life cycle. The antenna's industrial design is innovative. It works perfectly where reliability and efficient problem-free functioning is required.

Easy installation

The Ubiquiti antenna is distinguished by easy installation with Rocket. It does not require the use of any specialised tools. The device is equipped with a handle which allows for precise setting up of the antenna.

Use

The device is used e.g. to create Point-to-Point and Point-to-Multipoint connections.

Key features

- works in the 5 GHz band
- 30 dBi gain
- Dual Linear polarisation
- light construction
- easy installation
