encryptions, preventing the network from outside intrusions.

Wireless N Speed & Range

Complying with the IEEE 802.11n standard, TL-WR841N can establish a wireless network and get up to 15X the speed and 5X the range of conventional 11g products. Also, with transmission rates up to 300Mbps.

Better Wireless Performance

It shows more excellent abilities of mitigating data loss over long distances and through obstacles in a small office or a large apartment, even in a steel-and-concrete building. Above all, you could easily pick up the wireless network during long-distance connection where legacy 11g products may not! Which also means, the router has the speed to work smoothly with almost any bandwidth intensive application including VoIP, HD streaming, or online gaming, without the lag.

WPA / WPA2 Encryptions

WPA/WPA2 encryption standards ensure your wireless connection is safe from intruders.

WPS

Instantly setup WiFi connections simply by pressing the "WPS" button.

IP QoS

IP based bandwidth control allows administrators to determine how much bandwidth is allotted to each PC.

Easy Setup

Either using the optimized user interface and setup wizard or the CD (included) setup wizard will allow you to get ‘online’ quickly and easily.
