

Teltonika Straight compact mobile antenna

Model: PR1CS450

Manufacturer: TELTONIKA

EAN: 5704174946458

Product Code: 1577121

R744

The Teltonika PR1CS450 is a network antenna designed to enhance signal reception and transmission across a frequency band of 0.7-2.7 GHz. With an antenna gain level of 5 dBi, it effectively amplifies the signal strength for improved communication and data transfer rates. This model features an SMA connector with a male gender, ensuring compatibility with a wide range of devices. Constructed for durability and performance, the antenna supports linear polarization, which can help reduce signal interference and increase clarity in certain installations. The compact design includes a width of 54 mm and a diameter of 1.05 cm, making it suitable for installations where space is limited. Each pack contains one antenna, finished in black, blending seamlessly with most equipment and settings. The Teltonika PR1CS450 is tailored for users needing a straightforward, effective solution for enhancing their network capabilities without extensive modifications.
