

Teltonika WIFI SMA antenna

Model: PR1URF51

Manufacturer: TELTONIKA

EAN: 5704174786221

Product Code: 1577128

R714

The Teltonika PR1URF51 is a network antenna designed to enhance wireless signal strength and coverage. It features an antenna gain level of maximum 5 dBi, which helps in improving the transmission and reception of signals. Operating within a frequency band of 2.4-2.4835 GHz, it is well-suited for a wide range of wireless communication needs. With an impedance of 50 ohms, this antenna ensures efficient performance by matching the input impedance of the connected device to maximize power transfer. The RP-SMA connector with a male gender facilitates easy and secure attachment to compatible devices. The antenna employs linear polarization, which can help reduce interference and increase signal clarity in certain installation environments. It measures 195 mm in width, making it compact enough for installation in various settings without requiring excessive space. Each pack contains one piece of the Teltonika PR1URF51, allowing for straightforward deployment in both personal and professional environments. This antenna is engineered to provide a stable and enhanced wireless connection, supporting a broad range of applications.
