

TP-Link JetStream 8-Port 10GE SFP+ L2+ Managed Switch

Model: TL-SX3008F

Manufacturer: TP-LINK

EAN: 6935364006464

Product Code: 1577184

R6,549

Future-Proof Your Business with Full 10G Fiber Switch

JetStream 8-Port 10GE SFP+ L2+ Managed Switch

Full Fiber Switch with Lightning-Fast 10G

Build and expand your lightning-fast network with TP-Link TL-SX3008F—a fully managed switch with full 8-port 10G fiber ports and 160 Gbps switching capacity. Ideal for small, medium, and large business networks, it meets and surpasses the needs for high-speed, reliable, and safe enterprise networks.

Seamless Integration to Omada Cloud SDN

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Omada's Software Defined Networking (SDN) platform integrates network devices, including access points, switches, and routers, providing 100% centralized cloud management. Omada creates a highly scalable network—all controlled from a single interface. Seamless wireless and wired connections are provided, ideal for use in hospitality, education, retail, offices, and more.

Advanced L3 Features

An abundance of L2+ and L3 features are supported to help build a highly scalable and robust network, providing a reliable and efficient solution for enterprises, campuses and ISPs.

Secure Networking

Our high-quality security features defend against a range of network threats. They include IP-MAC-Port-VID Binding, Port Security, Storm Control, and DHCP Snooping. An integrated list of common DoS attacks is available, making it easier than ever to prevent them. The Access Control Lists (ACL, L2 to L4) restrict access to sensitive network resources by denying packets based on source and destination MAC address, IP address, TCP/UDP ports, or VLAN ID. User access to the network can be controlled through 802.1X authentication to grant access according to the valid user credentials.

Enterprise Level Features

A complete lineup of L2+ features is supported. 802.1Q VLAN, Port Mirroring, STP/RSTP/MSTP, Link Aggregation Control Protocol, and 802.3x Flow Control are among the innovative features. Advanced IGMP Snooping ensures the switch intelligently forwards multicast streams to appropriate subscribers and reducing unnecessary traffic, while IGMP throttling & filtering restrict subscribers at the port level to prevent unauthorized multicast access. Static Routing segments the network to route traffic efficiently.

Advanced Quality of Service (QoS)

Voice and video traffic can be prioritized based on IP address, MAC address, TCP port number, UDP port number, and more. With QoS, voice and video services remain smooth, even in situations of low bandwidth.

ISP Features

Internet Service Providers (ISPs) get the support they need with features including sFlow, QinQ, L2PT, PPPoE ID Insertion, and IGMP authentication. 802.3ah OAM and Device Link Detection Protocol (DLDP) provide straightforward monitoring and troubleshooting of Ethernet links across the entire network.

IPv6 Support

An enormous variety of IPv6 functions guarantees your network will be ready for the Next Generation Network (NGN) without the need to upgrade your hardware. Take advantage of features such as Dual IPv4/IPv6 Stack, MLD Snooping, IPv6 ACL, DHCPv6 Snooping, IPv6 Interface, Path Maximum Transmission Unit (PMTU) Discovery, and IPv6 Neighbor Discover to enhance your network environment.
