# Cisco CBS220-8T-E-2G-EU Smart 8-port GE, Ext PS, 2x1G SFP

Model: CBS220-8T-E-2G-EU

Manufacturer: CISCO

EAN: 889728344234

Product Code: 1577332

## R3,109

## YOUR BUDGET, YOUR NETWORK: CISCO BUSINESS 220 SERIES SWITCHES

Cisco Business 220 Series Switches are the ideal solution for businesses looking for reliability and security at an affordable price. With an intuitive control panel, users can easily manage their network, and Power over Ethernet (PoE) options add versatility in device configuration. Customizable features allow for optimal alignment with the specific needs of each organization while providing robust support for business operations. By choosing Cisco Business 220, you invest in stability and efficiency, making these switches an excellent choice for any company looking to build a strong and efficient network infrastructure.

# CISCO BUSINESS 220 SERIES: EXCEPTIONAL INFRASTRUCTURE FOR BUSINESSES

Cisco Business 220 Series switches are the ideal solution for small businesses looking to build an efficient and reliable network. With support for PoE+ and advanced security and Quality of Service (QoS) features, these switches enable easy integration of wireless access points, leading to increased employee productivity. Offering capabilities for unified communication systems, Cisco Business 220 Series automatically prioritizes latency-sensitive traffic, facilitating the deployment of IP-based solutions. Rigorous testing ensures full compatibility with other products, making these switches a versatile foundation for business infrastructure.

# DISCOVER THE POWER OF CISCO BUSINESS 220 SERIES!

Cisco Business 220 Series is the ideal solution for small businesses looking to create professional, high-performance networks. With easy configuration and user-friendly operation, these switches are designed for users without advanced IT knowledge. The integrated Cisco Business Dashboard allows for the management of switches, routers, and access points without the need for additional hardware, significantly simplifying network management processes. Additionally, the Cisco Network Plug and Play solution enables quick and secure deployment of new devices and updating of existing infrastructure. With reliability and high performance parameters, Cisco Business 220 Series ensures faster file transfers and better availability of critical business applications, leading to smoother communication between employees and clients.

# BOOST YOUR NETWORK PERFORMANCE WITH CISCO BUSINESS 220 SERIES

Cisco Business 220 Series is the ideal solution for companies looking to create modern, efficient networks. With support for Power over Ethernet (PoE+) technology, devices such as wireless access points, IP phones, or surveillance cameras can be easily deployed, resulting in cost savings and increased investment flexibility. High-class security features, such as port security and advanced access control lists, protect the network from unauthorized access and attacks while ensuring business continuity. Additionally, energy-efficient solutions built into the switches help reduce

operational costs and minimize environmental impact. Technical support and hardware warranty confirm the reliability and durability of Cisco products, providing peace of mind for users.

## SIMPLE NETWORK MANAGEMENT WITH CISCO BUSINESS DASHBOARD

Cisco Business Dashboard (CBD) is an innovative network management tool designed for easy implementation and maintenance of Cisco Catalyst series 1200 and 1300 switches, business switches, routers, and access points. With CBD, complex network management tasks become simpler and more efficient. The tool allows for quick discovery of new network topologies, generating detailed inventories of installed hardware, and monitoring the network. Automatic software updates and lifecycle and maintenance reporting ensure that the network remains current and fully supported. For those who need a simpler version, Cisco Business Dashboard Lite is available, offering key features without unnecessary complexity.
