

Teltonika Power cable with 4-way open wire

Model: PR2PL15B

Manufacturer: TELTONIKA

EAN: 4251877153535

Product Code: 1577757

R735

This power cable is designed with a 4-way open wire configuration, ensuring versatile connectivity options for various electrical setups. It features a robust 15-meter length, providing ample reach for installations that require a longer distance between power sources and devices. The cable is equipped with a durable jacket that protects against environmental factors and mechanical stress, enhancing its longevity and maintaining performance integrity in diverse operating conditions. The product supports a wide range of electrical applications, making it suitable for both commercial and industrial environments. Its construction adheres to high safety and quality standards, ensuring that it delivers consistent power supply while minimizing the risk of electrical faults. With its flexible design and extended length, this power cable facilitates easy routing and connection in spaces where standard cables might not suffice. It is an effective solution for setting up complex electrical circuits that require reliable and extended reach. The cable's open wire ends allow for custom configurations, tailoring to specific technical requirements and ensuring a secure, efficient power connection.
