

Teltonika I/O 2x3pin connector

Model: PR4RS06K

Manufacturer: TELTONIKA

EAN: 4779051841028

Product Code: 1577953

R553

The Teltonika PR4RS06K is a terminal block RS485 connector designed for robust and efficient data communication. This connector features a 2x3 pin configuration, which facilitates secure and stable connections for various industrial applications. The compact design ensures it can be integrated into systems with limited space while maintaining ease of access for maintenance and troubleshooting. Constructed with high-quality materials, the connector is built to withstand harsh industrial environments, ensuring durability and long-term performance. It supports RS485 communication protocol, known for its reliable data transmission over long distances and in electrically noisy environments. The Teltonika PR4RS06K is compatible with a wide range of devices, making it a versatile choice for system integrators and engineers looking to establish or expand their network infrastructure. Its straightforward installation process allows for quick setup, minimizing downtime and enhancing productivity. With its robust construction and advanced technical specifications, this connector is a valuable component for any setup requiring dependable serial communication.
