

TP-Link Omada 10GBASE-T RJ45 SFP+ Module

Model: SM5310-T

Manufacturer: TP-LINK

Product Code: 1578238

R1,755

The **TP-LINK SM5310-T** is a state-of-the-art **10G Base-T RJ45 SFP+** module designed to provide exceptional **high-speed data transmission** capabilities. With a maximum data transfer rate of **10300 Mbit/s**, this module ensures that your network can handle demanding applications with ease. It features an **RJ-45 interface**, making it compatible with standard copper networking cables, and adheres to the **SFP+** form factor standard, which is widely recognized in the industry for its reliability and performance.

Engineered for versatility, the **SM5310-T** supports a comprehensive range of **Ethernet standards**, including **IEEE 802.3**, **IEEE 802.3ab**, **IEEE 802.3an**, and **IEEE 802.3bz**. This compatibility allows for seamless integration into various networking environments, making it an ideal choice for both enterprise and home networks. The module is constructed with a robust **metal housing**, ensuring durability and longevity, while its sleek silver color allows it to blend effortlessly with other network equipment.

Operating efficiently on a low input voltage of **3.3 V**, the **TP-LINK SM5310-T** not only maintains system stability but also enhances energy efficiency, making it a smart choice for environmentally

conscious users. This module is particularly effective for extending network connections up to **100 meters**, guaranteeing reliable and speedy data transfer across your network. With its advanced technology and superior performance, the SM5310-T stands out as a leading solution in the market for high-speed networking needs.
