

Cisco C1300-8P-E-2G Managed PoE Gigabit Switch with 8 Ports and Lifetime Protection

Model: C1300-8P-E-2G

Manufacturer: CISCO

EAN: 889728522083

Product Code: 1578299

R9,383

CISCO CATALYST 1300: FLEXIBLE NETWORK FOR YOUR BUSINESS

Cisco Catalyst 1300 Series Switches are an excellent solution for small and medium-sized enterprises and branch offices, combining performance and affordability. These managed Gigabit Ethernet Layer 3 switches feature flexibility and security, making them an ideal choice for deployment outside the telecom cabinet. With software based on a customized Linux system and an

intuitive interface, network configuration becomes easier, and advanced features support digital transformation. Built-in security mechanisms protect critical business transactions, while the versatility and performance of the 1300 Series help build a better-connected work environment.

DISCOVER THE POWER OF CISCO CATALYST 1300 SOLUTIONS

Cisco Catalyst 1300 Series Switches are the ideal solution for companies seeking efficient and secure network infrastructure. They enable easy and secure connections for employees in offices, leading to faster file transfers and increased productivity. These switches also offer advanced traffic management, allowing integration of various communication services, such as IP phones. Additionally, their features provide secure connections for guests while ensuring the protection of critical business data. High performance and reliability are essential elements that support the growth of any organization.

SIMPLE NETWORK MANAGEMENT: HERE'S THE POWER OF 1300 SWITCHES

The 1300 Series switches are an excellent solution for commercial customers and their partners, combining ease of management with advanced features. With Cisco Business Dashboard, network management becomes simpler, eliminating traditional challenges associated with deployment and monitoring. Built-in onboarding tools and an intuitive user interface enable quick and efficient deployment of new devices without the need to expand the IT team. Additionally, support for the SNMP protocol and the ability to manage remotely via Bluetooth make network management convenient and flexible. These switches harmoniously combine modern technology with ease of use, making them an ideal choice for dynamic business environments.

DISCOVER RELIABILITY AND SECURITY WITH CISCO CATALYST 1300 SERIES

Cisco Catalyst 1300 Series Switches are an excellent solution for companies that require reliability and continuous operation around the clock. With support for dual images, software updates can be

performed without network downtime, ensuring constant access to data and resources. High-quality security features, such as support for IEEE 802.1X and port security, effectively protect against unauthorized access, while advanced defense mechanisms, such as dynamic ARP inspection and DHCP snooping, detect and block network attacks. Additionally, Power over Ethernet (PoE) capabilities allow devices such as IP phones or access points to be powered using a single Ethernet cable, simplifying the deployment of modern technologies in the company.

MODERN CISCO CATALYST 1300 SWITCHES FOR YOUR NETWORK

Cisco Catalyst 1300 Series Switches are a modern solution that supports network growth, adapting to the increasing number of devices and the evolution of IP protocols. With support for both IPv4 and IPv6, these switches enable a smooth transition to the next generation of networks while ensuring continuity of current business applications. Equipped with advanced Layer 3 traffic management, they allow for effective network segmentation and improved performance through dynamic routing. Additionally, the Front Panel Stacking feature enables easy management of multiple switches as a single unit, simplifying configuration and increasing the reliability of network applications. Combined with a compact design and energy-efficient features, Cisco Catalyst 1300 is the ideal solution for growing offices and dynamic environments that value both performance and environmental responsibility.

BUILD A RELIABLE NETWORK FOR YOUR OFFICE AND SMB

Cisco Catalyst™ 1300 Series Switches are a key element of the network for any branch office and small and medium-sized enterprises. These affordable and easy-to-use switches provide not only reliability but also security, which is extremely important in today's business world. With management through Cisco® Business Dashboard and the Cisco Business mobile app, users gain simplicity and efficiency, eliminating the operational complexity that often consumes valuable time and resources. By choosing Cisco Catalyst 1300, businesses gain a solid foundation for their growth, supporting seamless operations from connectivity to cloud applications.
