

Dahua LR1002-1ET-V3 ePoE Extender Transmitter, 1x RJ45, 1x BNC, PoE Range up to 800m

Model: LR1002-1ET-V3

Manufacturer: DAHUA

EAN: 6923172589637

Product Code: 1578440

R1,154

The **Dahua LR1002-1ET-V3 ePoE Extender Transmitter** is a cutting-edge solution designed to extend your network capabilities. With a **PoE range of up to 800 meters**, this device effectively facilitates power and data transmission over extended distances, making it ideal for large-scale installations. Featuring a single **RJ45** port and a **BNC** port, the LR1002-1ET-V3 ensures versatility in connecting various devices, providing reliable performance whether in residential or commercial settings.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Manufactured by the renowned **Dahua Technology**, the LR1002-1ET-V3 leverages advanced ePoE technology, which enhances the performance of traditional PoE devices and minimizes the need for additional cabling. This superior technology ensures consistent data transmission and power supply while optimizing security applications, particularly in environments where conventional wiring can be challenging.

With its robust design and exceptional features, the **Dahua LR1002-1ET-V3** stands out among competitors in the field of network extension devices. This model is ideal for users seeking reliability and efficiency in their surveillance and networking setups, ensuring that your systems remain operational over greater distances without compromising on quality.
