

Hikvision DS-1H18S/E(C) Video Balun

Model: DS-1H18S/E(C)

Manufacturer: HIKVISION

EAN: 6931847129972

Product Code: 1578458

R636

This video balun is designed to convert a video signal into a balanced signal, allowing for transmission over twisted pair cables like Cat5e, which can significantly extend the transmission distance compared to traditional coaxial cable. It supports both PAL and NTSC formats, ensuring compatibility with a variety of video systems. The device is capable of handling video transmission up to 200 meters for 720p HD-TVI cameras and up to 250 meters for 1080p HD-TVI cameras, making it suitable for use in large-scale surveillance systems.

Constructed with a compact and durable design, the video balun features a built-in transient voltage suppression to protect against voltage spikes. It also includes interference rejection and noise filtering to enhance the quality of the video signal. The unit is easy to install, requiring no additional tools for cable connections, and its lightweight design facilitates easy mounting and setup. This video balun is an effective solution for extending video signals over long distances while maintaining high-quality video output.
