

Hikvision DS- 2FA1205-C8 Multi-channel SMPS

Model: DS-2FA1205-C8

Manufacturer: HIKVISION

EAN: 6931847164911

Product Code: 1578467

R987

This multi-channel switched-mode power supply unit is designed to efficiently distribute power across multiple channels, making it suitable for a variety of applications that require consistent electrical support. With an input voltage range of 100-240V AC, it adapts easily to different power environments, ensuring a stable output voltage of 12V DC. The unit features eight channels, each capable of delivering up to 1.25A, allowing simultaneous power supply to multiple devices.

Constructed with a robust metal casing, the unit is built to withstand demanding environments and ensure durability. It also includes safety features such as over-voltage, over-current, and short-circuit protection, enhancing the operational safety and longevity of connected devices. The compact design facilitates easy installation and integration into existing setups without requiring excessive space.

Efficiency is a key aspect of this power supply, as it operates with minimal energy waste, which can help reduce operational costs. It is also compliant with relevant international safety and performance
