

Hikvision DS- 2CD2345G0P- I(1.68mm) 4 MP Super Wide Angle Fixed Turret Network Camera

Model: DS-2CD2345G0P-I(1.68mm)

Manufacturer: HIKVISION

EAN: 6941264021476

Product Code: 1578473

R7,273

Equipped with a 1.68mm lens, this network camera captures high-resolution images at 4 megapixels, ensuring detailed and clear visual coverage. The super wide-angle lens offers an expansive field of view, making it suitable for monitoring large areas with reduced blind spots. The device supports H.265+ video compression technology, which enhances encoding efficiency and reduces data storage demands.

This camera features a fixed turret design that is both durable and weather-resistant, making it suitable for outdoor installation. It operates effectively in a range of lighting conditions, thanks to its IR cut filter and built-in IR LEDs that provide up to 30 meters of night vision.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Additional functionalities include 3D digital noise reduction, which improves video quality by reducing noise in low-light conditions. The camera also supports various smart detection features such as motion detection, video tampering alarm, and intrusion detection, which help in enhancing security measures.

The camera is designed for easy installation and can be integrated seamlessly into existing video surveillance systems. It supports both PoE (Power over Ethernet) and can be accessed remotely via a compatible network.
