# Hikvision DS-3E0510HP-E 8 Port Gigabit Unmanaged POE Switch

Model: DS-3E0510HP-E

Manufacturer: HIKVISION

EAN: 6941264031611

Product Code: 1578479

## R3,061

This device is an unmanaged POE switch equipped with eight Gigabit Ethernet ports, designed to facilitate high-speed network connections. Each port supports Power over Ethernet (PoE), allowing it to provide both electrical power and data connectivity to PoE-enabled devices through a single cable. This feature simplifies the cabling process and reduces the need for additional power sources.

The switch is capable of automatically detecting the required power for connected devices, ensuring a streamlined and efficient power distribution. It supports a maximum PoE power budget of 123 watts, making it suitable for a variety of devices such as IP cameras, VoIP phones, and wireless access points.

With a compact design, the switch is easy to install and fits well in various environments, including small offices and home networks. It operates silently, as it does not have a built-in fan, which also
