

Teltonika RUT301 Industrial Ethernet Router

Model: RUT301000000

Manufacturer: TELTONIKA

EAN: 4779051840786

Product Code: 1578486

R2,256

This industrial router is designed to facilitate robust and secure internet connectivity in various environments, including remote and industrial settings. It supports the latest wireless communication standards, ensuring fast and efficient data transfer rates. The device is equipped with multiple Ethernet ports, allowing for the connection of several wired devices simultaneously. Featuring advanced security protocols, the router provides a secure network by protecting data from unauthorized access and cyber threats. It is built with durable materials, making it suitable for operation in harsh conditions where temperature and humidity can vary widely. The router also includes VPN functionality, which enables secure connections over the internet, essential for businesses that require remote access to their internal networks. Its user-friendly interface allows for easy setup and management, reducing the need for extensive technical knowledge. Energy efficiency is a key aspect of this device, as it operates on low power consumption, helping to reduce operational costs and environmental impact. Firmware updates are available to ensure the router remains compatible with new technologies and security standards.

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.
