Ubiquiti UACC-OFC-MM-2M 10 Gbps OM3 Duplex LC Cable

Model: UACC-OFC-MM-2M

Manufacturer: UBIQUITI

Product Code: 1578624

R703

The **OM3 Duplex LC-LC Fiber Optic Patch Cable** is designed for high-performance data transmission, making it an essential component for modern networking environments. Manufactured with precision, this cable features a **50/125 µm fiber mode** that ensures optimal signal clarity and minimal loss. With a **PVC cable jacket** and an **aqua color**, it not only provides durability but also enhances visibility in cable management systems.

One of the standout features of this product is its **low insertion loss** of ≤ 0.3 dB, which significantly reduces signal degradation over long distances. The cable is designed with **UPC to UPC polish** to further enhance performance, ensuring that your data transmission remains reliable and efficient. Additionally, the **repeatability** of ≤ 0.1 dB and **durability** of ≤ 0.2 dB after 1,000 mating cycles demonstrate the cable's robustness, making it suitable for both commercial and residential applications.

Operating effectively in a wide range of environments, this fiber optic patch cable can withstand ambient temperatures from **-40 to 75° C (-40 to 167° F)**. With a **wavelength range of 850 /**
