

Teltonika RUT206 Industrial Router 4G LTE with RS232 and RS485

Model: RUT206010000

Manufacturer: TELTONIKA

EAN: 4779051842049

Product Code: 1578892

R4,118

The **Teltonika RUT206** (Product Code: **RUT206010000**) is a compact industrial **2G/3G/4G (LTE) router** designed to deliver seamless connectivity for various applications. Equipped with **2 Fast Ethernet ports** (10/100 Mb/s), **2.4 GHz WiFi**, and a range of I/O interfaces including **RS232/RS485**, this router is ideal for advanced networking solutions. The **RutOS** software enhances its capabilities, making it a versatile alternative to the industrial cellular router **RUT956**.

One of the standout features of the **RUT206** is its dual SIM capability, providing **redundancy in connectivity** through the Dual SIM failover function. This ensures uninterrupted operations by automatically switching to a backup connection in case of failure, making it a reliable solution for

maintaining operational efficiency in industrial environments. Additionally, the router supports key industrial protocols such as **Modbus, DNP3, and DLMS**, ensuring compatibility with various legacy equipment and monitoring systems.

With a **compact design** measuring 83 x 25 x 83 mm, the **RUT206** fits seamlessly into crowded equipment racks or tight control cabinets, maximizing space for other essential devices. Its robust construction, along with features like **active and passive PoE** support, simplifies installation and enhances the durability of the device in demanding industrial settings. The added microSD slot for data storage further enhances its functionality, allowing for quick access to critical data directly on the device.
