Western Digital Gold 12TB WD122KRYZ

Model: WD122KRYZ

Manufacturer: WESTERN DIGITAL

EAN: 718037901442

Product Code: 1578938

R16,309

ADVANCED HARD DRIVES FOR DEMANDING ENTERPRISES

The offered hard drives with an impressive capacity of up to 26 TB are the ideal solution for businesses that prioritize performance and reliability in data management. With advanced construction, these devices can handle even the most demanding workloads, supporting annual read and write operations of up to 550 TB. This means your data storage will not only be spacious but also optimally tailored to the specifics and needs of your business, leading to better efficiency and smooth processes.

REVOLUTION IN DATA STORAGE: WD GOLD 26 TB ON THE HORIZON

The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

The WD Gold 26 TB model is a groundbreaking hard drive that introduces a new quality to the market with its unique 11-disk HDD platform. This 10th generation HelioSeal® technology is the result of over a decade of innovations that not only increase capacity but also provide unmatched performance and reliability. WD Gold 26 TB is the perfect solution for demanding applications where storing vast amounts of data is crucial. With modern technologies, this hard drive guarantees long-lasting performance and security of stored information, making it an excellent choice for professionals and businesses.

INCREASED RELIABILITY OF WD GOLD DRIVES FOR YEARS TO COME

WD Gold hard drives stand out for their exceptional reliability, making them the ideal choice for professionals and enthusiasts who need a proven solution for data storage. With a five-year limited warranty and an impressive MTBF rating of up to 2.5 million hours, these drives offer not only high performance but also excellent resistance to failures. By investing in WD Gold, you gain the assurance that your valuable information is in safe hands, allowing you to focus on project execution without worrying about data loss. High-quality components and advanced manufacturing technology make these drives an excellent choice for anyone who values quality and durability.

INNOVATIVE ROTATIONAL VIBRATION PROTECTION TECHNOLOGY

Our innovative rotational vibration protection (RVS) technology represents a true revolution in stability and performance. By utilizing two precise sensors, the system can not only predict but also actively counteract disturbances, ensuring uninterrupted operation even in the most demanding conditions. This solution is ideal for environments with high vibration levels, where traditional methods would fail. By choosing our technology, you gain the assurance that your devices will operate at the highest level, regardless of the circumstances.

INNOVATIVE ARMORCACHE™ TECHNOLOGY FOR HIGHER PERFORMANCE

Western Digital's ArmorCache™ technology is an innovative solution that combines excellent data protection with exceptional performance. Designed for capacities of 22 TB and above, this advanced feature provides enterprise-class protection in the event of sudden power loss in write cache mode (WCE). This ensures that users can be confident that their data is safe even in challenging conditions. Moreover, when write cache mode is disabled (WCD), ArmorCache™ technology allows for a significant performance boost, making it ideal for demanding environments.

WD GOLD DRIVES: FLEXIBILITY AND SECURITY IN EVERY APPLICATION

WD Gold drives offer an excellent combination of flexibility and security, confirmed by detailed testing and validation in various environments. Designed for enterprise-class applications, these drives perform exceptionally well in servers, data storage, and RAID configurations. With robust construction and advanced technology, WD Gold not only offers high performance but also reliability, making them the ideal solution for demanding users who need assurance that their data is always in safe hands.

WD GOLD HDD DRIVES – PERFORMANCE AND RELIABILITY FOR BUSINESS

WD Gold HDD drives are the ideal solution for businesses and professionals who prioritize reliability and performance. With the latest technological innovations, these drives handle large workloads resulting from intensive data read and write operations, making them an excellent choice in demanding corporate and commercial environments. Offering exceptional durability and flexibility in capacity, these drives are designed for small and medium-sized businesses that want to secure their critically important data and support creative project processes. WD Gold guarantees efficiency and peace of mind in a world where every piece of information matters.
