

Ubiquiti U7 Pro XG Wall 5800 Mbit/s White Power over Ethernet (PoE)

Model: U7-Pro-XG-Wall

Manufacturer: UBIQUITI

EAN: 810177165118

Product Code: 1579235

R7,727

UNMATCHED PERFORMANCE WITH WIFI 7 TECHNOLOGY

The Ubiquiti Access Point U7 Pro XG Wall is engineered to deliver exceptional wireless performance with its cutting-edge WiFi 7 technology. Supporting a robust 6 GHz radio, this access point offers lightning-fast speeds of up to 5.8 Gbps on the 6 GHz band, ensuring seamless connectivity for high-bandwidth applications. With a total of six spatial streams across multiple bands, it can efficiently handle over 300 client connections, making it an ideal solution for high-density environments such as offices, schools, and public venues.

VERSATILE CONNECTIVITY OPTIONS FOR MODERN NETWORKS

The product information provided is for reference purposes only. Technical specifications, photos, descriptions and prices may change without prior notice. The manufacturer and seller are not responsible for possible data discrepancies or typographical errors. We recommend checking the current information before purchasing.

Equipped with a 10 GbE uplink, the U7 Pro XG Wall provides versatile connectivity options that cater to the demands of modern networks. It supports Power over Ethernet (PoE+), simplifying installation while reducing cable clutter. The access point is designed for wall mounting, making it easy to integrate into various environments without compromising aesthetics. With a coverage area of up to 1,500 square feet, it ensures reliable wireless coverage throughout the space, enhancing user experience and productivity.

ADVANCED FEATURES FOR ENHANCED NETWORK MANAGEMENT

The U7 Pro XG Wall is packed with advanced features that elevate network management and user experience. It supports wireless meshing, band steering, and fast roaming, ensuring optimal performance and seamless transitions for mobile devices. Additionally, it offers robust security features such as guest network isolation, voucher authentication, and dynamic RADIUS-assigned VLANs, providing administrators with the tools needed to manage user access effectively. These capabilities make it a powerful choice for businesses looking to enhance their wireless infrastructure.

DURABLE DESIGN FOR RELIABLE OPERATION IN ANY ENVIRONMENT

Constructed from high-quality polycarbonate and aluminum alloy, the U7 Pro XG Wall is built to withstand a wide range of environmental conditions. With an operating temperature range of -30 to 40°C and humidity tolerance of 5 to 95% non-condensing, this access point is suitable for both indoor and outdoor installations. Its NDAA compliance and certifications from CE, FCC, and IC ensure that it meets rigorous standards for safety and performance, making it a reliable choice for any network deployment.
