

Ubiquiti UCG-Industrial gateway/controller 1000, 2500, 10000 Mbit/s

Model: UCG-Industrial

Manufacturer: UBIQUITI

EAN: 810177162827

Product Code: 1579394

R15,645

UNMATCHED PERFORMANCE FOR HIGH-DENSITY ENVIRONMENTS

The Ubiquiti Cloud Gateway Industrial (UCG-Industrial) is engineered for high-density Power over Ethernet (PoE) deployments, delivering an impressive 350W of total system power. With advanced routing capabilities and support for up to 500 simultaneous clients, this ruggedized, fanless device ensures seamless connectivity and performance in demanding industrial settings. Its robust design and powerful quad-core ARM Cortex-A73 processor at 2.2 GHz make it an ideal choice for environments requiring reliable and efficient network management.

COMPREHENSIVE SECURITY FEATURES FOR PEACE OF MIND

Equipped with advanced Intrusion Detection and Prevention Systems (IDS/IPS) capable of handling 5 Gbps throughput, the UCG-Industrial offers comprehensive security features to protect your network. With over 55,000 IDS/IPS signatures, it provides robust defense against cyber threats. The device also includes stateful and application-aware Layer 7 firewalls, content filtering, and advanced traffic identification, ensuring that your network remains secure while maintaining optimal performance.

VERSATILE CONNECTIVITY OPTIONS TO MEET DIVERSE NEEDS

The Ubiquiti Cloud Gateway Industrial supports a wide range of connectivity options, including multiple WAN ports for flexible network configurations. With one 10G SFP+, one 10 GbE RJ45, and one 2.5 GbE RJ45 port, it allows for efficient load balancing and redundancy. Additionally, the device supports various VPN protocols, including IPsec, OpenVPN, and WireGuard, enabling secure remote access and site-to-site connectivity. This versatility makes it suitable for various applications, from enterprise networks to remote monitoring.

ROBUST MANAGEMENT AND MONITORING CAPABILITIES

Designed for ease of management, the UCG-Industrial integrates seamlessly with the UniFi application, allowing for centralized control of over 50 managed UniFi devices and 15 HD cameras. The pre-installed 128 GB microSD card provides ample storage for network video recording (NVR), while features like Internet quality reporting and additional failover options enhance reliability. The device's management capabilities are further complemented by its compatibility with the UniFi mobile app, ensuring users can monitor and manage their network on the go.

DURABLE DESIGN FOR EXTREME ENVIRONMENTS

The Ubiquiti Cloud Gateway Industrial is built to withstand harsh conditions, with an operating temperature range of -30 to 50°C (-22 to 122°F) and humidity tolerance of 5 to 95% non-condensing. Its rugged enclosure, made from polycarbonate and aluminum alloy, ensures durability in industrial settings. Additionally, the device is NDAA compliant and certified by CE, FCC, and IC, making it a reliable choice for organizations that prioritize security and compliance in their network infrastructure.
