24/7 Recording: Never Miss What You Shouldn't.

AOV Dual utilizes Imou's industry-leading Always-on Video (AOV) technology, which allows the camera to record one frame every 3 seconds to conserve memory and power when there is no event, but immediately switches to full-frame recording when an event occurs, meeting the needs of both all-day recording and power saving.

Longer the Detection, Safer the Protection

Based on AOV technology, the AOV Dual has a much longer detection range than ordinary battery cameras, up to 25 meters, without false human or vehicle detection.
