ASUS ROG POLLING RATE BOOSTER WHITE

Model: 90MP03T0-BRUA10

Manufacturer: ASUS

EAN: 4711387394700

Product Code: 1581449

R906

Enhance Every Move

Elevate your wireless precision and performance with the ROG Polling Rate Booster. Featuring a true 8000 Hz wireless polling rate, this tiny accessory is an ROG-exclusive solution that helps gamers unlock new levels of cursor control and minimalized latency on their compatible ROG mouse and keyboards – without the need for an additional receiver.

Stay Ahead with Minimal Delays

The ROG Polling Rate Booster transmits wireless data at higher frequencies from your keyboard or mouse to your device. Compared to the standard 1000 Hz rate, gaming with a 4000 Hz or 8000 Hz

polling rate means that cursor positions or keyboard inputs are significantly up-to-date, which translates to minimal delays between your movements and what is registered on screen.

This heightened level of responsiveness can provide you with a mechanical edge during critical moments in the game, ensuring that every in-game action is executed precisely as you intend.

Seamless Syncing

The benefits of a higher polling rate is much more pronounced when playing on high-refresh-rate monitors. Reducing the delays between cursor data input and each display frame also effectively minimalizes the inconsistencies in between the intervals of registered data polls. This results in much smoother, more accurate swiping and tracking, giving you better control over your maneuvers.

Industry-Leading Wireless Performance

The ROG Polling Rate Booster offers up to a true 8000 Hz report rate in both wireless and wired modes. When paired with the ultralow latency ROG SpeedNova wireless technology, the ROG Polling Rate Booster drive performance further to deliver the least possible delay in the industry.

Connect Any Way You Want

Due to the heavy loads of higher data reporting frequencies, the ROG Polling Rate Booster performs optimally when it is within a 60 cm range, with minimal to no obstructions in between the device and the Booster.
The ROG-exclusive design allows players to adapt the Booster to any PC set up.

Upgrade Your Favorite ROG Devices

The design of the ROG Polling Rate Booster allows you to enjoy higher performance without the need for an additional receiver. Simply plug in the receiver of your compatible ROG mouse or keyboard to unleash its potential.
