

COUGAR Case Fan MHP 120, Black, 3-pack

Model: CGR-CF-MHP12HB3

Manufacturer: COUGAR

EAN: 4710483773358

Product Code: 1581624

R1,192

High Performance Radiator Fan

Through structural adjustment and precision tuning, MHP 120 fan is suitable for any cooling fan position inside the chassis. In addition, the metallic-reinforced motor hub & metallic bearing shell design drastically increases the stability and cooling performance. MHP120 is the perfect choice for cooling fan upgrades!

Extremely Hyper Fan With 2000 RPM(max)

Proven with data from certified professional testing labs, MHP 120 delivering 82.48 CFM/ 143.53 m3/h high air flow and 4.24mmH2O high static pressure. Moreover, it features a high fan speed capable of reaching up to 2000 RPM, providing outstanding performance, MHP 120 fan is the fan that dominates!

Metal-reinforced

Motor Hub & Shell

With the metal-reinforced motor hub and metal bearing shell design, MHP 120 fan generates excellent rotational stability that takes enhanced performance and durability to a whole new level.

HDB Bearing Equipped & PWM Control

MHP 120 is equipped with HDB bearing (Hydro Dynamic Bearings), that extends the fan's life span and reduces decibel effectively. Meanwhile, PWM control technology allows for total control on fan speed to reach that perfect balance between machine performance and cooling.

Anti-vibration Damper

MHP 120 cooling fan is equipped with rubber dampers at four edges of the fan that absorbs vibration. Further reducing noise from mounting gaps and/or resonance in the chassis, adding to the quiet performance of your PC system.

More Suitable For Radiator / Heatsink

With the high static pressure level of MHP 120, it is an excellent choice for most of the radiator & heatsink in maximizing their heat dissipation. And of course, MHP 120 is also compatible, and can be mounted to most of the air / water cooler from other brands with ease.
