Contour Design Balance Keyboard BK Wireless-DE Version

Model: 102100

Manufacturer: CONTOUR

EAN: 743870051726

Product Code: 1581975

R3,465

Possibly the most ideal keyboard for you

Balance Keyboard helps you keep a good position with your arms in front of your body when working with a centered mouse. Despite its compact design, the keyboard has all the functionality of a full-size keyboard. It comes with shortcuts, media keys, and a numeric keypad. Furthermore, the keyboard is ergonomically designed with adjustable tilt, so you can choose the inclination that fits you best. Balance Keyboard BK is all black and perfectly matches the latest minimalist RollerMouse Pro and SliderMouse Pro designs. If you are not working with a centered mouse but want to optimize your ergonomics, you can get a wrist rest separately for a more comfortable posture.

The perfect ergonomic partner for RollerMouse Pro and SliderMouse Pro

Balance Keyboard BK minimises the edge under the space bar and reduces your fingers’ stretching. Reducing the distance to the keyboard has a massive ergonomic impact, so bringing the keyboard and RollerMouse or SliderMouse Pro closer together gives you the optimal distance between the keyboard and mouse. The all-black design with white print complements the RollerMouse Pro and SliderMouse Pro perfectly.

Ergonomic keyboard designed with an adjustable tilt to match your needs

The adjustable legs and tilt functions make it easy to set the keyboard in three different positions: negative, neutral, and positive tilt. When you place the keyboard in a negative tilt, your hands automatically angle to the optimal position for typing. Ultimately, it leaves your fingers much more relaxed when typing.

Get more desk space without compromising functionality

Although the Balance Keyboard BK is compact, it has all the features of a full-size keyboard, including a separate numeric keypad, function buttons, and media control. Balance Keyboard is compatible with both PC and Mac.
