Bluetooth keyboard and wireless USB keyboard for PC, phone and tablet

Use one keyboard for all your devices with the Manhattan Ultra Slim Dual-Mode Wireless Keyboard. It connects up to three devices such as PC, Macbook®, Chromebook®, iPad® Pro or smartphone simultaneously: two via Bluetooth and one via its 2.4 GHz USB-A micro receiver. With just the touch of a button, you can easily switch between them (for example, from your phone to write a WhatsApp text and back to your notebook to write an email).

The benefits of wireless freedom

Cut the cord from your wired USB keyboard to declutter your desk and raise your typing comfort over the touchscreen on your tablet/phone – all with 10 m (33 ft.) wireless range. Auto-power management with sleep mode and an on/off switch can lengthen the battery life of this keyboard up to 1.5 years.

Quiet and comfortable typing

The low-profile, scissor-style key switches give you a comfortable, highly precise typing experience with a responsiveness you feel but don’t hear. Windows® and Mac® keys offer the versatility you

need in a multi-device setup. Twelve function keys offer quick access to frequently used multimedia commands like email, browser or music control.

Maximum compatibility

Connect to everything you want. The Manhattan Ultra Slim Dual-Mode Wireless Keyboard offers wireless connectivity to Windows, macOS®, Android™, iOS®, Chrome OS®, iPadOS® and Linux® systems. The plug-and-play installation remains quick and easy with no configuration or drivers needed.

Ultra-compact and convenient

Its compact form is ideal for small workspaces and to give you more room for your mouse. The built-in storage on the back for batteries and the USB receiver keeps the keyboard tilted for maximum typing comfort. Also mounted on the back are four rubber feet to prevent slipping and to protect your desk from scratches.
