USB-C Docking Station with PD Charging - connect HDMI monitor, network, peripherals and (micro)SD cards to your device

Increase your productivity with this highly versatile docking station from Manhattan. It establishes a fast, simple and convenient link between newer USB Type-C equipped media sources (laptops, PCs, MacBooks, Chromebooks, computers, tablets, etc.) and existing HDMI displays (monitors, TVs and projectors) for 4K at 30 Hz images in either mirror- or extended-display mode.

Connections to all your peripherals

With three USB-A ports (two with 5 Gbps and one with 480 Mbps transfer speeds) for mice, keyboards and flash drives, and two slots for SD/microSD cards, this docking station easily satisfies all your connectivity demands. Plus, its Gigabit RJ45 port provides the wired network connection that's missing in most modern Ultrabooks™ and MacBooks®.

Up to 100 W charging power with USB-C Power Delivery (PD)

The included USB-C PD port lets you charge your notebook with power up to 100 W while simultaneously charging your other mobile devices, such as smartphones or tablets, through the USB-A ports. The Power Delivery function also provides faster charging than standard chargers, since it determines the power needs of compatible devices and supplies it at the quickest and safest rate.

Take your phone to the big screen

Connect any Android 9 and later smartphone that supports video output over USB-C DP Alt Mode to enjoy your apps and media even more. Watch a video on your monitor or flip through the slides of your presentation - all from your phone.

A multiport adapter that's made to go where you go

Sturdy aluminum housing makes this multiport adapter the perfect travel companion. With its many connectivity options, it has a footprint of only 98 x 46 x 15 mm (3.86 x 1.81 x 0.59 in.), so it's small enough to fit in an outer notebook bag pocket.
