HDMI Active Optical Cable - enjoy Ultra-High-Definition (UHD) performance over extra-long distances with flexible connections and no interference

The Manhattan High-Speed HDMI Active Optical Cable with Detachable Connector is the perfect solution for delivering an HDMI signal to a desired location such as a classroom, conference room, healthcare facility, trade show or another commercial environment. Active Optical Cable (AOC) technology offers several advantages over standard HDMI cables. Its smaller cable diameter ensures greater flexibility and maneuverability during installation into tight spaces and features a Micro HDMI type-D connector for a narrower connection through walls. You can attach the included HDMI type-A adapter for your traditional, full-scale source-to-display connection and enjoy your videos in ultra-sharp, smooth 4K@60Hz. Its construction from fiber strands eliminates the risk of electromagnetic/radio frequency interference to give the best performance, stability and reliability when is use. The AOC is an excellent choice for high-interference environments such as data centers, surgical theaters, DJ events or manufacturing facilities where high resolution and consistent display are critical.
