DUOFACE PRO RGB

The Rule of Two

There are always two sides to every story, and the Duoface Pro RGB is no exception. It offers two distinct front panels that showcase the two sides of its personality: one panel puts the dazzling RGB lighting on display, while the other is optimized for superior airflow. This latest addition to the Duoface series is a true embodiment of flexibility and innovative open-layout design.

A Game of Two Halves

With the new tool-less assembly feature, switching between panels requires minimal effort, allowing you to quickly and easily prioritize between optimizing air intake or showcasing the view of your build on the fly.

No Style Without Substance

The innovative quick slide dust filter of the Duoface Pro RGB is both highly functional and aesthetically pleasing, with stylish edges that visually sets it apart. Additionally, you can easily slide off the dust filter without removing the front panel, making maintenance a breeze. Why choose between functionality or style when you can have both?

Access All Areas

The removable top panel and detachable front bracket offer unimpeded access to the interior, providing you with an extra-large space that makes assembling your rig the easiest it’s ever been.

Double Duty

The cable management bar is cleverly designed to also function as a graphic card holder, making the most efficient use of available space. This innovative design not only gives you a clear view of your components but also improves performance stability.

Industrial Light and Magic

Equipped with four 120mm ARGB fans and a highlighted logo, the Duoface Pro RGB allows you to control a variety of stunning lighting effects with the touch of a dedicated RGB button. Additionally, the built-in LED controller is fully compatible with 5V ARGB connections on motherboards, enabling seamless system-wide lighting synchronization.

Hustle and Flow

Crafted from high-quality metal and punctuated with 5.0mm diameter perforations, the airflow panel of Duoface Pro RGB delivers exceptional ventilation and generous fresh air intake.

Size Matters

Thanks to its 240mm wide-body design, the Duoface Pro RGB offers an ample interior space that easily accommodates an E-ATX motherboard, a 390mm graphics card, and two 3.5″ HDDs and two

2.5″ SSDs, making it perfect for even the most demanding system builds.

Beat the Heat

With support for up to nine fans, a 360mm water cooling radiator, and a CPU cooler up to 190mm in height, the Duoface Pro RGB’s impressive cooling potential completely eliminates any risk of your critical components overheating.
