Explore a new dimension of gaming audio with BenQ's CinematicSound technology. Our dedicated Bongiovi DPS enhances audio dynamically to craft a 3D audio realm filled with depth and distance.

Build Your Sanctuary

Step into a world of gaming luxury provided by the X3100i gaming projector. Boasting 3300 ANSI lumen high brightness and versatile installation capabilities, the X3100i is designed to help you craft your ultimate gaming haven.

Vertical Lens Shift

Support for 40-60% vertical lens shift delivers more installation flexibility, either for mounting on a ceiling or placing the projector on a table. Images can be shifted up and down without sacrificing image quality.

Easy, Flexible Projection

With a throw ratio of 1.15-1.5 and 1.3x zoom, you can customize screen sizes to fit various spaces effortlessly and project a captivating 100" screen from just 2.5m for expansive entertainment viewing. All without the hassles of complicated installation.

Digital Zoom

Embrace a wider view and easily resize the projected image with the digital zoom. All-encompassing gaming is now showing right in front of you without any blind spots or view-compromised angles.

Tailored for Every Game Type

Customized visual and audio tuning for different game genres delivers better gaming experiences and enhanced sensory immersion.

Auto Game Mode for All Consoles

BenQ's Auto Game Mode effortlessly identifies Xbox, PlayStation, and Switch console inputs, instantly recalling your previous game mode settings for a tailor-made gaming experience.

Precision Enhanced with FPS Crosshair

The FPS Crosshair feature projects a targeting reticle onto the screen, empowering players to swiftly and accurately lock onto adversaries in ever-challenging battles.

BenQ SettingXchange

Download expert projector image settings from top gamers and experience gameplay through the eyes of pros thanks to ready-made celebrity profiles. Share your projector image settings with fellow gamers to help them level their experiences, or import theirs. Experiment and find your best profile with this unique option!

Game Bigger and Brighter

Enjoy superior 4LED color volume, high contrast, optimized saturation, and enduring colors with long 10+ year LED light source life.

Expand Your Gaming Universe

BenQ helps you game on your terms. Whether on PS5/PS4, Switch, or Xbox Series X, dual HDMI 2.0b universal connectivity has you covered.

Google-Licensed Android TV for Ultimate Streaming

Powered by Google-licensed Android TV, the X3100i offers a vast online media library, enabling you to indulge in true 4K content streaming from platforms like Netflix. Enjoy your favorite movies and shows in 4K with just a click in the intuitive interface.
