R10,516

The professional HP Pro Shredder 16MC shreds your sensitive and personal company data, patient records or process files in micro cut according to the requirements of the General Data Protection Regulation. The micro cut shreds the documents into 2 mm x 15 mm small clippings and thus fulfils the high security level P-5. This elegant document shredder in black design has a cutting capacity of 16 DIN A4 sheets and is thus the most powerful among the HP Pro Shredders in micro cut. The HP Pro Shredder 16MC on lockable castors quietly brings 55 decibels to the meter and is a quintessential feature of any open-plan office, medical practice or law firm where sensitive data must be correctly destroyed.
