

# Tracer 47690 Pano 2D Dash Cam, Black

Model: TRAKAM47690

Manufacturer: TRACER

EAN: 5907512877340

Product Code: 1596139

## R1,079

Full HD front camera and rear view camera The device is equipped with a front camera that records in Full HD (1920x1080) resolution at 30 fps, which allows you to record the most important details while driving. The reversing camera in VGA (640x480) resolution additionally supports manoeuvring and provides an image from behind the vehicle, useful when reversing. Clear 3" IPS screen The built-in 3-inch IPS-based screen provides good visibility from different angles, making it easy to use in all lighting conditions. The screen is not only used to view recordings and operate menus, but also displays the image from the rear view camera. Wide viewing angle - 130° The front camera lens covers a 130° field of view, allowing you to capture not only the road ahead, but also the adjacent lanes and the roadside. Such a range increases the chance of registering events that may affect the assessment of the situation on the road. Parking Mode & Motion Sensor The DVR is equipped with a parking mode function that allows you to automatically start recording when motion is detected near the vehicle. The motion sensor works independently of the engine, which allows monitoring even when stationary - a solution especially useful in car parks. Loop recording and G-sensor The loop recording function allows you to continuously record footage - when the memory is full, the oldest files are automatically replaced with new ones. The built-in G-sensor detects sudden events such as

sudden braking or impact, and automatically protects the current footage from being overwritten – to preserve key moments from the route. HDR and Night Mode HDR improves the contrast and clarity of recorded images in conditions of large differences in lighting – such as when driving against the sun or in the shade. Night mode supports image capture after dark, increasing the readability of details in the dark. Built-in microphone and speaker The integrated microphone allows you to capture audio and video, which can be helpful for documenting traffic situations with full context. The speaker, on the other hand, allows you to play back recordings directly from the device, which makes it easier to quickly verify the saved material. Compact design and emergency battery The small and discreet shape of the dashcam ensures that the device does not restrict visibility and can be easily mounted behind the mirror. The built-in 150 mAh battery powers the DVR in parking mode, allowing you to record even with the engine off and the power disconnected. Manufacturer: Tracer | Display : 3.0" IPS | Number of cameras: 2 | Main camera resolution: 1920 x 1080 (Full HD) | Frame rate: 30 fps | Viewing angle: 130°
